Docker · Kubernetes · Azure · Linux · CI/CD · GitHub Actions

DEV TOOLS

Git · GitHub · Maven · Gradle · Postman · IntelliJ IDEA · VS Code

Full-Stack Developer & Backend Engineer building scalable web apps, APIs, and cloud-native systems. Skilled in backend services, database design, and modern frontend UIs. Passionate about **AI-powered products** and developer tooling. Experienced with **Java, Spring Boot, React, Node.js**.

> **Built SCM Capital's end-to-end Dangote Refinery IPO platform: automatic payments via Globus Bank, direct NGX submission, 1,500+ applications worth ₦1.6bn.**

TECH STACK // full

Spring Boot · Node.js · Express.js · RESTful APIs · Microservices · WebSocket · Webhooks · React.js · Next.js · TanStack Start · React Native · Tailwind CSS · HTML5 / CSS3 · PostgreSQL · Supabase · MySQL · MongoDB · Redis · JWT · OAuth 2.0 · RBAC · Kafka · System Design · Distributed Systems

WORK EXPERIENCE // exp.log

Full-Stack Developer — 2026

SCM Capital Limited · Dangote Refinery IPO Subscription Platform

- Built a full-stack platform taking investors from **online application through payment to NGX subscription**, processing **1,500+ applications worth ₦1.6 billion**
- Integrated **Globus Bank APIs** to issue each applicant a virtual account and confirm payments in real time via **webhooks**, replacing manual matching of bank transfers
- Connected the platform to the **NGX subscription gateway** with idempotent submission, preventing duplicate subscriptions and duplicate debits of the firm's funding account
- Built **Excel bulk upload and top-up flows** so staff and partner brokers could safely process large batches of pre-funded investors
- Built staff tools for submission tracking, payment reconciliation and investor lookup, with **role-based access** and automatic email confirmations
- Handled individual, corporate and minor applicants, with checks on BVN, NIN, CSCS/CHN, bank and broker details before submission

`React · TypeScript · TanStack Start · Supabase (PostgreSQL) · Tailwind · REST & Webhooks · cPanel (Node.js)`

Backend Developer — MAY 2026 – PRESENT

Lincoln City Property

- Engineered and maintained **backend services and core business logic** for a mobile banking app in a microfinance environment
- Designed, optimized, and managed **relational database schemas**, queries, and data access for reliability, security, and performance
- Conducted comprehensive testing, troubleshooting, and performance tuning to enhance **scalability and stability**
- Collaborated cross-functionally with developers and stakeholders to ship feature enhancements
- Produced and maintained technical documentation for backend architectures, APIs, and workflows

Backend Developer — FEB 2026 – MAR 2026

Gurox

- Developed and maintained **backend services** and application logic
- Built and managed database structures and queries
- Tested and debugged backend systems for **performance and scalability**
- Collaborated with team members to improve system functionality; documented processes for future use

HAJOH WEALTH

FULL-STACK DEV · JUNIOR GAME DEV

CORE STRENGTHS

- Problem-solving & analytical thinking
- Strong communication & interpersonal skills
- Cross-functional teamwork
- Organization & time management
- Adaptability & willingness to learn
- Attention to detail & quality focus
- Project planning & task management
- Critical thinking & decision-making
- Ownership & independent execution
- Continuous improvement mindset

WORK EXPERIENCE // cont.

Backend Developer

OCT 2025 - JAN 2026

Agreonpay

- Collaborated with UI/UX designers and frontend developers to **build and integrate APIs**
- Designed and implemented **RESTful API endpoints** for web applications
- Handled server-side logic, data processing, and database interactions
- Maintained and optimized backend performance and application reliability
- Assisted in building frontend screens

AI Instructor

2 MONTHS

Instructor & Mentor

- Taught students the **fundamentals of AI**, covering core concepts and how modern AI systems work
- Trained students to **use AI tools effectively** for learning, productivity and building
- Covered **AI vulnerabilities and risks**, including security weaknesses, misuse and limitations, so students use AI responsibly
- Explained complex technical topics in clear, beginner-friendly terms with hands-on practice

THINGS I BUILT // projects

Second Brain — Personal Intelligence OS

- AI-powered cross-platform desktop assistant that tracks user activity, system performance, clipboard history, browser history and file events in a **searchable timeline**
- Developed **Aria**, an AI voice assistant delivering real-time system alerts, productivity insights and conversational help using local and cloud LLMs

`Rust · Tauri · React · TypeScript · SQLite · Ollama · OpenRouter`

LinkedSave

- Full-stack app that extracts and downloads images and videos from public LinkedIn posts using **browser automation**
- Responsive React frontend with an Express backend: secure media extraction, session management and download proxy

`React · TypeScript · Tailwind CSS · Express.js · Puppeteer · Axios · Vite`

Ometer Programming Language

- Designed and built a **custom programming language** with a lexer, parser, compiler, bytecode generator and virtual machine
- Built a command-line interface for compiling and executing Ometer programs, with an extensible compiler architecture

`TypeScript · Node.js · npm`

FlowCSS

- Zero-dependency CSS framework with **40+ animations**, glassmorphism, 3D utilities, responsive layouts, dark mode and reusable UI components
- Published as an **npm package** with CDN support for easy integration into web apps

`CSS · JavaScript · npm`
